

Ride with GPS - Accessing a Drive Event (drive route) – please note that the screens may look slightly different between an iPhone vs an Android

For new users, your home screen will look like this.

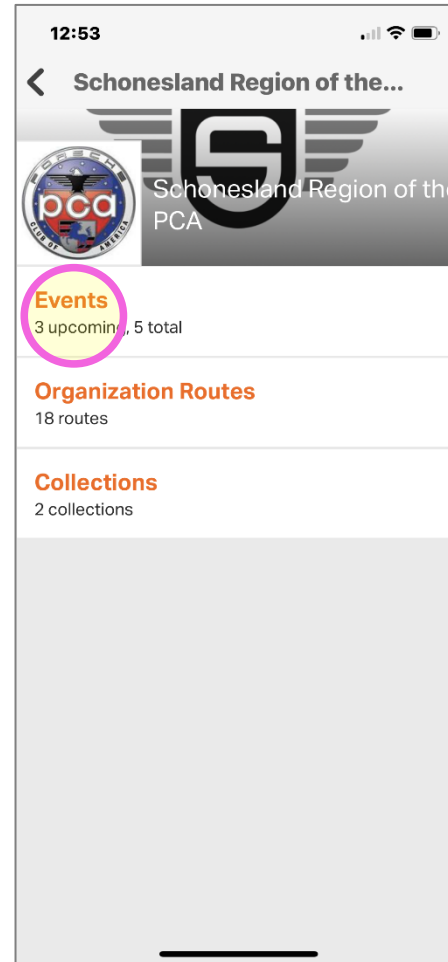

To find a planned Event, click on the **“More”** button on the bottom right.

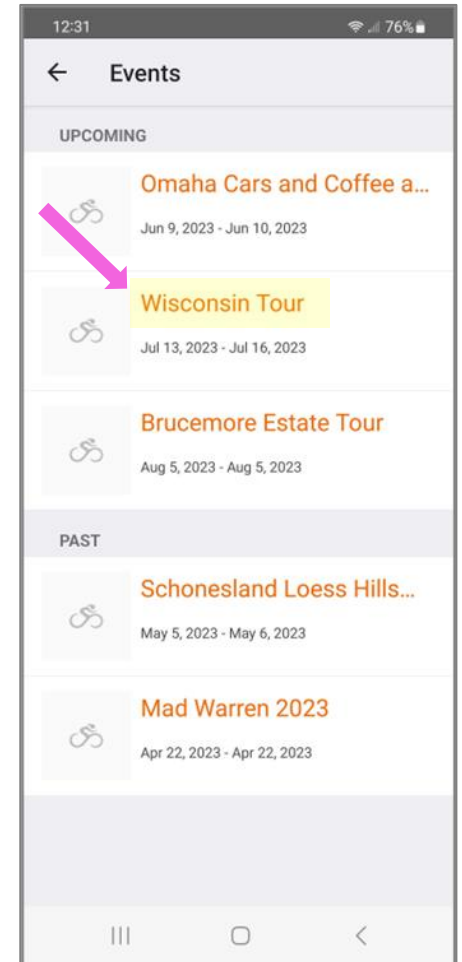

Then click **“Club”**...

Then click **“Events”**...

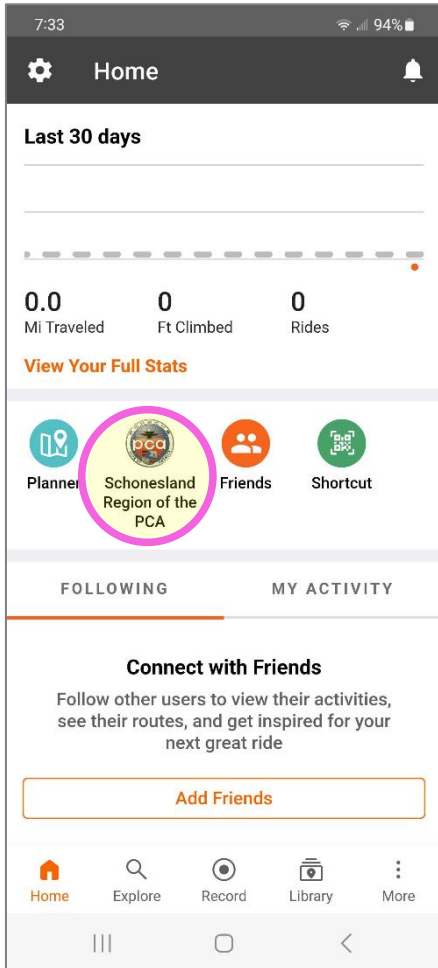

Then click on the **“Event”** you are attending... now skip the next page, and go to page 3

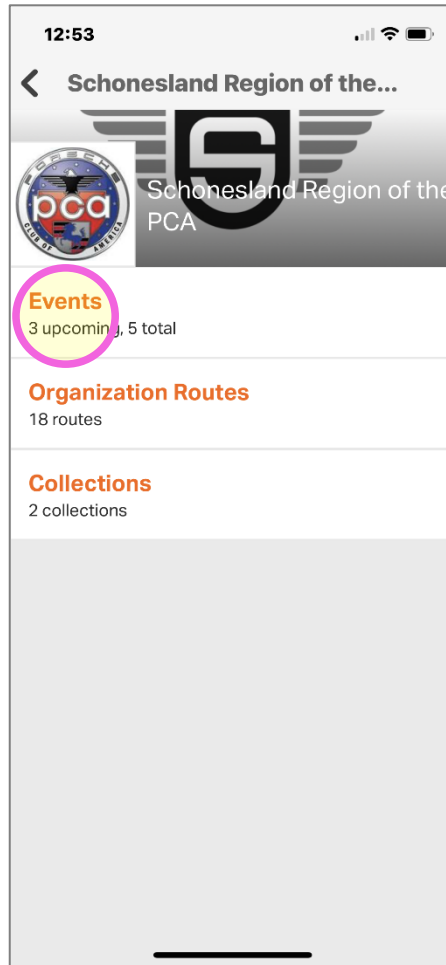

After using the app a few times, your home screen will look like this.

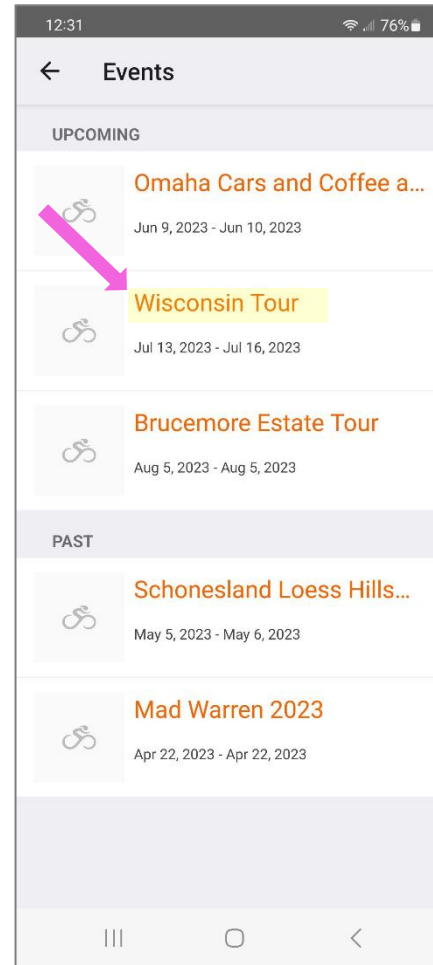

To find a planned Event, click on the **PCA logo**.

To find a planned Event, click on the **“More”** button on the bottom right.

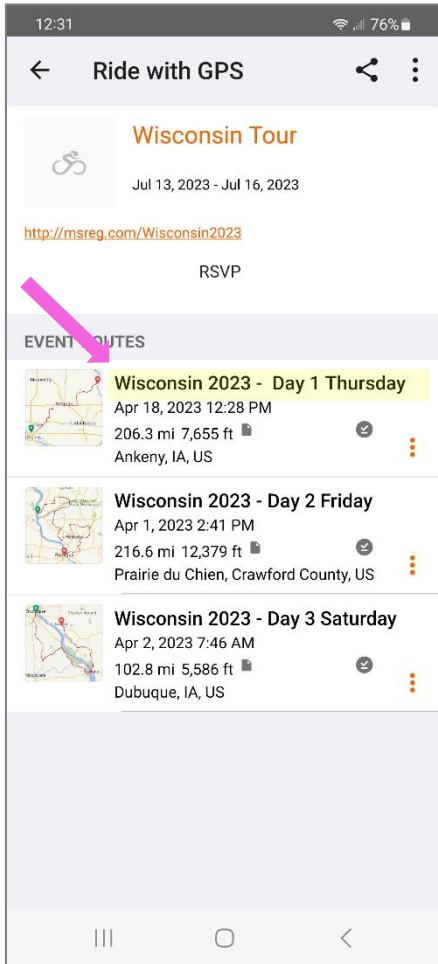

Then click on the **“Event”** you are attending...

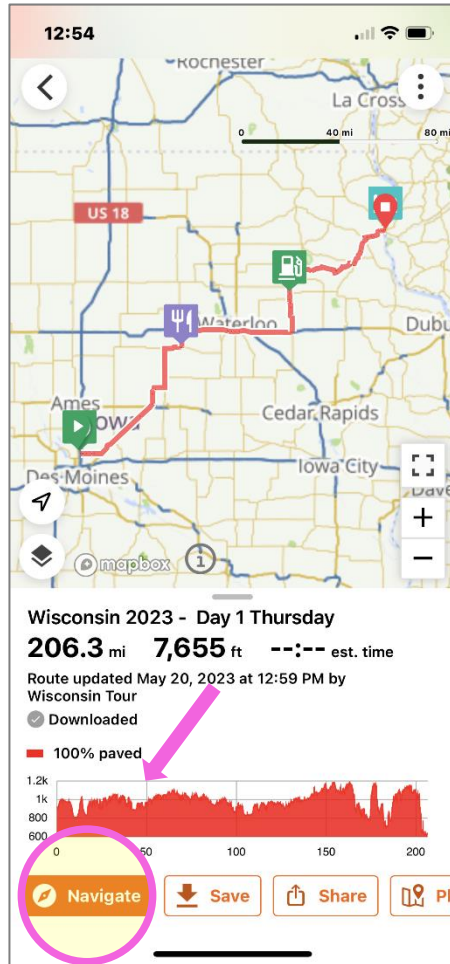

To access a Route for the Event

Click on the “Route” for that day

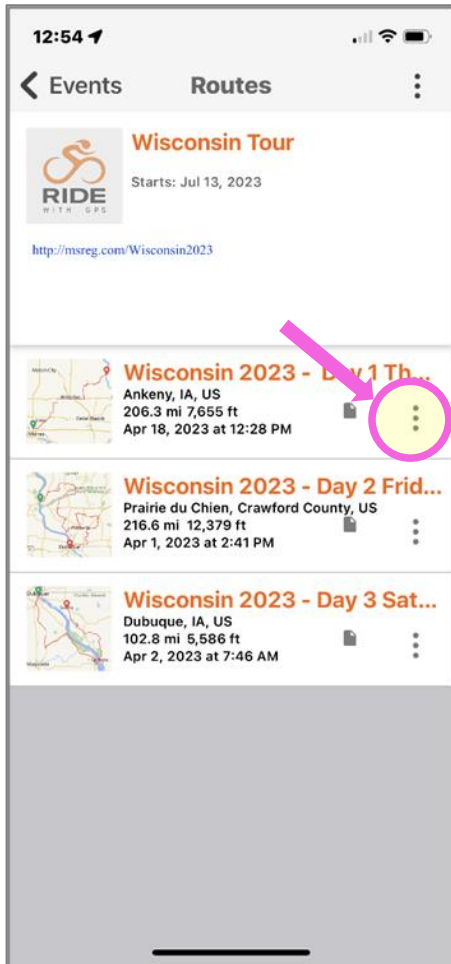

Click “Navigate” to start the Route.

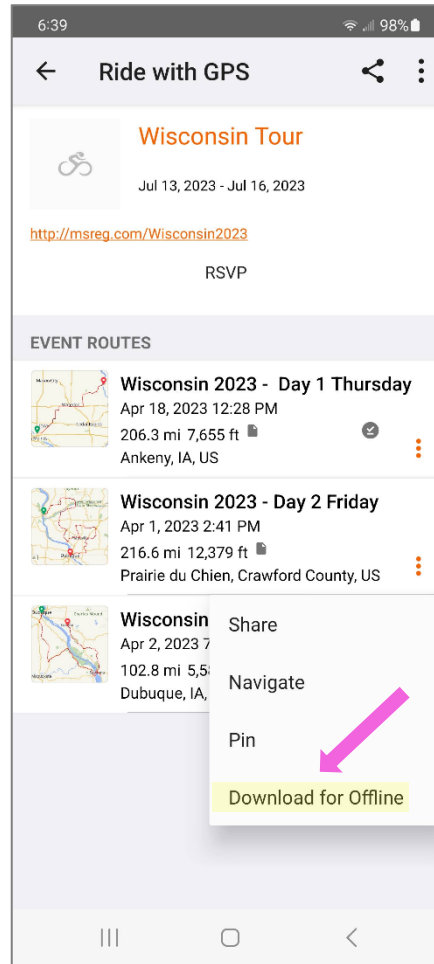

Weak Cellular Coverage

If you will be driving in an area with weak, or no cellular coverage, please follow the steps below to download the maps for offline use, several days prior to the drive.

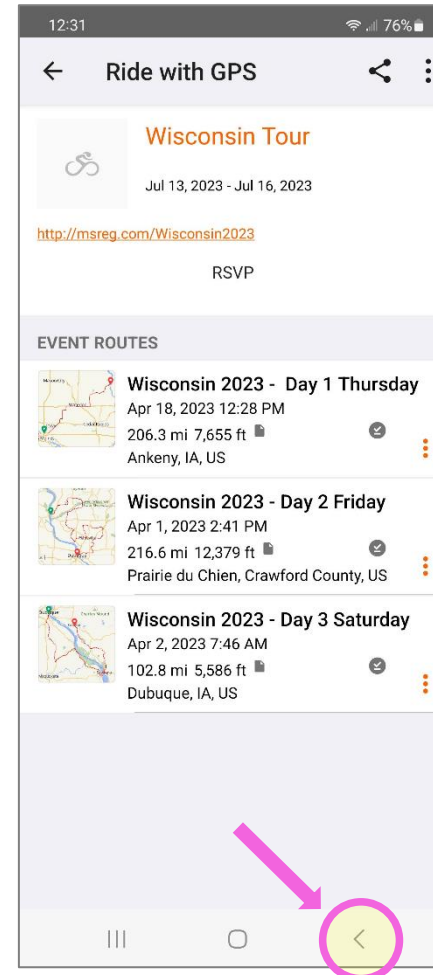

Find the **Route**, and click on the three dots...

Then click **"Download for Offline"**.

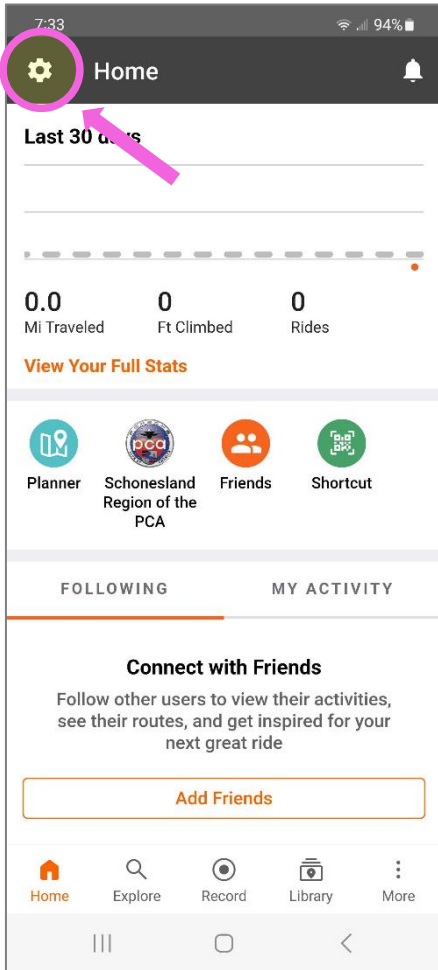

Go Home by tapping the back arrow button of your phone until you are on the Home screen

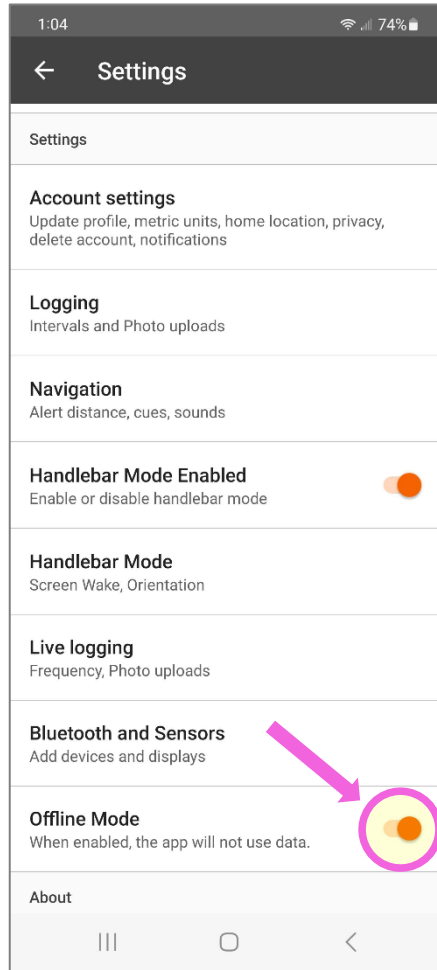

Placing your phone into “Offline Mode”

Go to your Home page... and click the “Settings” icon

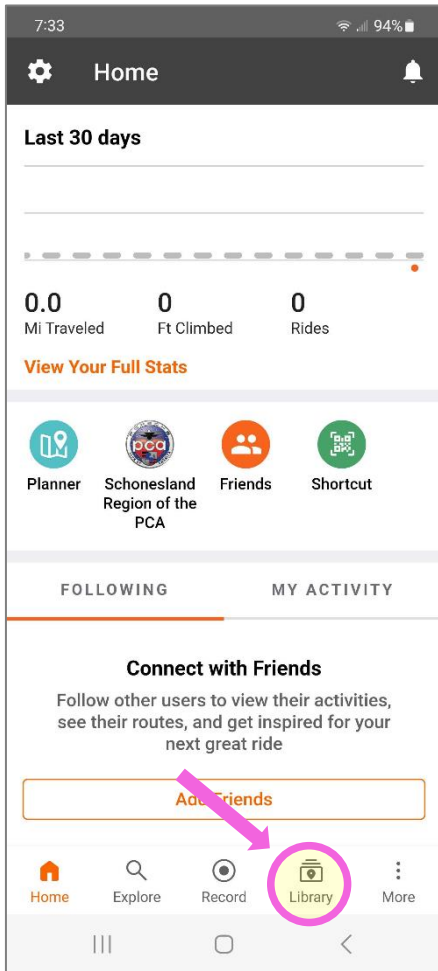

Toggle the “Offline Mode” to activate it

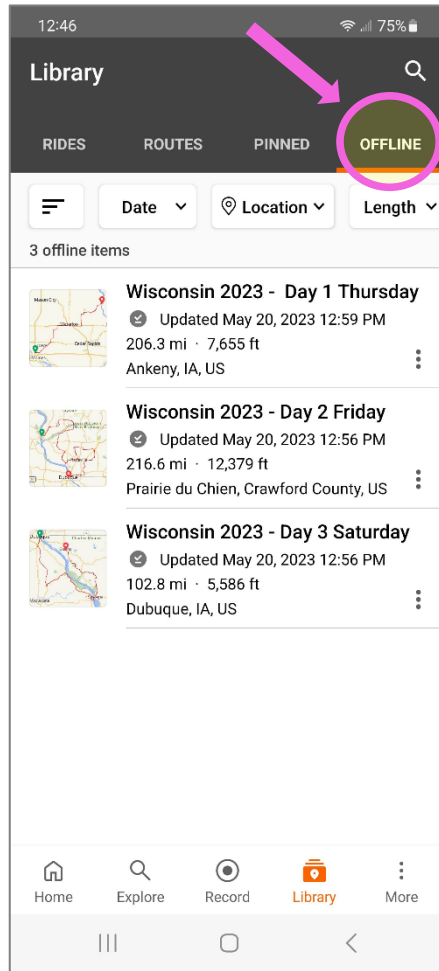

Finding the downloaded "Offline Route"

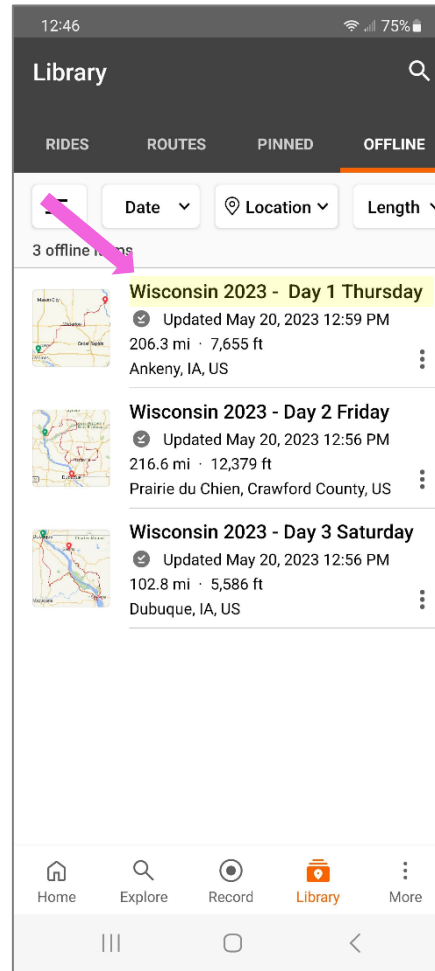

Find the route, click on the "Library" icon...

Then click "Offline" tab to see your downloaded Routes.

Click on the drive for that day.

Click "Navigate" to start the Route.

Stop or Pause Navigation

Click **pause button** once to pause.

Click & hold the button to stop navigation.

When you push & hold to stop, you'll have the option to **Resume** or **Finish**.

When you click Finish, you can **Save** the drive on your phone, or **Delete**, by scrolling up to not save it. Note that it will NOT delete the drive from the Club account – it simply does not save it on your phone.
